

## KSI Topic Homework - Our World

You may present your work in any way that you wish -models, songs, poems, videos or posters. The choice is yours! Please complete at least one topic homework from this grid. Please send all homework in to school no later than Friday 24th March.

Homework will be shared as a whole class during the last week of the half term.

|                   | Task option 1                                                                                                                                | Task option 2                                                                                                                                                                             |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Remember</b>   | Why are trees important for our environment?<br>Can you create a report?                                                                     | Find out about one of the seasons and create a poster to showcase what you have remembered!                                                                                               |
| <b>Understand</b> | Record your own weather forecast for Great Britain. Can you talk about the weather, temperature and wind speed for some of the major cities? | Choose one of the seasons and write a poem to showcase what you know about it. Choose a season and pack a suitcase to match. Do a video and talk us through what you have packed and why! |
| <b>Apply</b>      | Go into the woods and examine the trees. Use a leaf key to identify the trees you can see.                                                   | Take your art work outside and sketch something in the natural environment.                                                                                                               |
| <b>Analyse</b>    | Measure the temperature outside every day for a week. Which day was the hottest and which day was the coldest?                               | Create your own rain gauge and measure the rainfall each day for a week. Create a table to showcase your findings.                                                                        |
| <b>Evaluate</b>   | Create your own musical rain stick! Was your project successful? How could it be improved next time?                                         | Create your own seasons quiz for your friends to complete. Can they get the answers right? Make sure you have the answers ready to ask them!                                              |
| <b>Create</b>     | Create a sculpture or piece of art using only natural materials. Tell us a little about your inspiration.                                    | Take a camera outside and take photographs of interesting things that you spot in the natural environment.                                                                                |
